

19 May 2023

Dear President Cyril Ramaphosa

Please note that the views shared here are supported by many more people, and that number is increasing rapidly

The intelligence of most if not all South Africans is been grossly underestimated by some (and probably many) politicians, especially those who have allowed power to corrupt their perspectives and possibly even their values

Each person is (a sovereign* being) endowed by our Creator with rights such as Life, Freedom, etc (and is only accountable to the Creator for everything). The sovereign being/s / person/s may elect others to govern certain matters on their behalf, for their benefit (for which the others are rewarded)

Every person who serves in an official (government) capacity need to always do so in a manner consistent with the agreed T&Cs, such as the SA Constitution and obviously its Bill of Rights, which contains some of our rights as sovereign beings and obviously as citizens

Many of us have been tracking the performance of certain (government) officials / servants. It is dismal to say the least, especially in terms of matters pertaining to energy, education, and health (in particular)

The past few years have awakened many of us, and that number is increasing thanks to the poor governance by many elected officials.

The crux of this note to you personally, President Cyril Ramaphosa is to ensure that you convey the dissatisfaction of FASA and everyone who we represent to the Minister of Health in particular, as well as the rest of Parliament and the NEC members regarding the disastrous manner in which

- 1) most matters pertaining to health have been conducted in the past few years, and
- 2) efforts by the WHO to legally bind countries (who are members at this stage, such as South Africa) to a Pandemic Preparedness Treaty and International Health Regulations (IHR) that are inconsistent with our Constitution and Bill of Rights** (apart from the violation of the rest of our sovereign rights) – note health is a fundamental choice of the individual (sovereign) being and a health practitioner (if he/she so chooses), and

FREEDOM IS THE POWER TO CHOOSE ... ONWARDS & UPWARDS !

3) nobody has consulted with the citizens of SA at any stage about the plans by the WHO to (attempt to) usurp the God given authority about our own health (individually and nationally)

You and every (government) official / servant will be held responsible to the full extent possible for any deviation from your duties to uphold our rights in the SA Constitution as a minimum, and are reminded to cease any activity that is not consistent with the T&Cs in the SA Constitution, as it automatically disqualifies the person to represent the citizens of SA in any capacity whatsoever

It is the view of an increasing number of people that government has indeed betrayed the trust of the people of South Africa (in many areas, including health)

You are welcome to contact us by email as indicated below

Yours Sincerely

FASA Leadership
